

FOR IMMEDIATE RELEASE

GrandBridge Corporation Announces Strategic Investment in VCT Group Inc.

Cambridge and Kitchener, ON (July 8, 2026) – GrandBridge Corporation is pleased to announce a strategic investment in VCT Group Inc. The investment reflects GrandBridge Corporation's commitment to enabling distributed, cost-effective renewable energy solutions that provide customers with more options to manage their energy needs.

VCT Group is an Ontario-based provider of commercial solar energy solutions, delivering commercial rooftop solar, EV charging, solar carports and operations and maintenance services, with a portfolio of more than 300 projects across North America.

GrandBridge Corporation will join VCT Group's longstanding group of shareholders and provide additional financing which will repay outstanding debt and grow the company's service platform by investing in product development and remote monitoring systems.

We look forward to working with the VCT Group team, led by Brian Unrau.

Quotes

Sarah Hughes, President and CEO, GrandBridge Corporation

"As electricity demand continues to rise, driven by electrification and growth in our communities, distributed solar represents a practical and cost-effective option for adding new generation quickly while offering opportunities for customers to participate in the [Save on Energy](#) and [Net Metering](#) programs. Combined with other innovative grid solutions, like GrandBridge Energy's new [GridShare](#) Local Capacity Auction program, these resources can help reduce pressure on our local electricity system while creating a more sustainable and resilient future for the communities we serve."

"We have been impressed with VCT Group's dedication to developing innovative solar solutions, such as the proprietary Heliostation™ carport system, their customer-focused approach, and their strong connection to the communities where they operate. We are excited to partner with VCT Group and look forward to expanding access to cost-effective and sustainable energy solutions that will benefit customers while helping strengthen our local electricity system."

Brian Unrau, President, VCT Group Inc.

"This investment reflects where the industry and the policy environment are headed. With utilities and regulators increasingly supporting distributed generation, clean energy alternatives have proven themselves to be an efficient, practical, and strategic solution for businesses and communities across Ontario. GrandBridge Corporation's investment is a strong signal of confidence in that direction. We're proud to be the company GrandBridge Corporation has chosen to invest in as we lead the charge on commercial solar projects across North America, particularly in solar carports through our proprietary Heliostation™ system."
